- IntelliJ IDEA / Eclipse
- Android Studio
- Docker (basic)
- Firebase
- Scrum / Agile

LANGUAGES

- Spanish
- Catalan
- English

SOFT SKILLS

- Teamwork
- Clear communication
- Proactivity
- Attention to detail

PROFESSIONAL PROFILE

Junior developer with a growing passion for Unity and video game development, as well as backend and web development. I have hands-on experience supporting projects through gameplay mechanics, asset integration, and prototype optimization. My background in multiplatform and backend development gives me a structured, problem-solving mindset that I apply equally to game projects and web applications.

PROFESSIONAL EXPERIENCE

Rey Juan Carlos University

Madrid
May 2025 – Jun 2025

Game Development & Virtual Reality Intern

- Developed gameplay mechanics for educational games and virtual reality projects in Unity.
- Collaborated on 3D asset integration and performance optimization in prototype builds.
- Worked alongside the design team on technical implementation and VR support tasks.
- Took part in team meetings and technical project reviews throughout the internship.

Singular Things

Backend & Web Development Intern

Madrid
Mar 2024 – Jul 2024

- Contributed to frontend and backend development tasks in web applications using Angular, HTML and CSS.
- Participated in code reviews, functional testing, and basic deployment workflows.
- Worked with Docker and Firebase in real development environments under a Scrum methodology.
- Gained solid experience collaborating within a professional development team.

EDUCATION

IES La Arboleda

Specialization Course in Video Game Development

Madrid · 2024 – 2025

IES Barajas

Higher Technician in Multiplatform Application Development (DAM)

Madrid · 2020 – 2022

NOTABLE PROJECTS

- Developed an educational game prototype in Unity during the URJC internship, featuring interactive mechanics and VR environments.
- Personal portfolio showcasing Unity, C# and web development projects (available at rdjl-dev.github.io).
